PROJECTS

Tour & Travel Management Software

- Duration: 1 Year
- Technologies Used: CodeIgniter 4, MySQL, JavaScript
- Team: 2 team members
- Project Features: Developed a comprehensive Tourism Management System featuring tour management, customer inquiries, booking management (Train, Hotel, Holiday Packages, and Flights), user registration, customer management, issue tracking and resolution, booking approval and cancellation workflows, and reporting and analytics modules.

Hotel Booking Inventory Management System

- Duration: 6 Months
- Technologies Used: PHP, MySQL, CodeIgniter 3, HTML, CSS, JavaScript, Bootstrap
- Project Features: Developed a comprehensive Hotel Management System with Admin, Staff, and Customer portals, featuring booking management, room management, and user management modules. Implemented complete CRUD (Create, Read, Update, Delete) operations, search functionality, and new booking management to streamline hotel operations and enhance user experience.

Peaceg (Meditation)

- Duration: 3 Months
- Technologies Used: WordPress Custom Theme Development, PHP, MySQL, JavaScript, JQuery
- Project Features: A global meditation platform with magic-link authentication for passwordless login. It includes two sections—Pause Room and Meditation Room—where users join scheduled meditation sessions based on local timezone. Features include real-time video streaming, comments, live participants tracking, and auto session scheduling. Admin panel provides timezone-wise analytics, watch time reports, and session engagement insights.
- URL: <https://peace9.org>

Hybrid Events

- Duration: 4 Months
- Technologies Used: WordPress, MySQL, jQuery, HTML, CSS
- Project Features: An event management platform combining in-person and virtual components. Includes WP Event Manager plugin integration, event ticket management, and calendar integration for seamless scheduling and booking

Vanatex

- Duration: 4 Month
- Technologies Used: WordPress, MySQL, jQuery, HTML, CSS
- Team: 3 team members
- Project Features: A custom WooCommerce-powered WordPress theme for professional workwear. Features multiple home/product page layouts, printing & embroidery options, and a wide range of functional workwear catalog management.
- URL: <https://vanatex.be>
